Hiring Manager

Royal Bank of Canada (RBC)

Toronto, ON

RE: Application for Backend Developer Position

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Backend Developer position at RBC. As a Computer Programmer Analyst currently completing an Advanced Diploma at George Brown College , I have developed a strong foundation in building scalable, efficient server-side logic and managing complex data structures. My academic excellence, evidenced by being named to the Dean's List every semester, reflects my commitment to technical mastery and professional growth.

Throughout my technical projects, I have demonstrated a high level of proficiency in backend technologies, including Java, PHP, Python, and C#. I have successfully designed and implemented systems that require robust data management and session handling, such as:

- **Clinical Management System**: Utilized Object-Oriented Programming (OOP) and Unified Process methodology to streamline patient records and appointment scheduling.
- **Voting & Topic Management Systems**: Developed PHP-based applications featuring dynamic file handling and real-time updates.
- **Inventory & Student Management**: Built logic-heavy systems in C# and Java for tracking stock levels, managing orders, and processing complex records.

Beyond my coding capabilities, my experience as a Tutor and Lab Monitor at George Brown College has honed my ability to communicate technical concepts clearly and collaborate effectively within a team. I have accumulated over 150 hours of experience providing instruction and troubleshooting software issues , which has made me highly adaptable and proactive in solving problems in fast-paced environments.

I am particularly drawn to RBC's reputation for innovation in financial technology and its commitment to excellence. I am confident that my technical skills in SQL/MySQL , my understanding of Agile and Scrum methodologies , and my disciplined approach to writing optimized code would make me a valuable addition to your development team.

Thank you for your time and consideration. I look forward to the possibility of discussing how my background and technical skills can contribute to the continued success of RBC.

Sincerely,

Mansi
